

scala rider® SMARTPACK™

**Smart Communication
for small groups**

Cardo is proud to lead the revolution of group communication for riders, this time with small groups in mind.

The scala rider® SMARTPACK™ includes both DMC™ (Dynamic Meshwork Communication) and Bluetooth® technologies to give you the best of both worlds. Bluetooth mode enables you to communicate with non-SMARTPACK riders, operate your mobile phone, receive navigation instructions from GPS devices, and listen to music (via A2DP).

What is DMC and how does it differ from the traditional Bluetooth technology?

DMC is a groundbreaking technology developed by Cardo to completely change how group riders communicate with each other. Instead of the traditional Bluetooth 'daisy-chain' intercom connection, the group is connected in a dynamic network to ensure that communication remains uninterrupted at all times. In SMARTPACK's DMC Intercom mode, a group of 4 riders can communicate at a remarkable range of up to 3 miles / 5 km, and any of the members can leave / join the group, or receive incoming phone calls at any given time, without compromising the conversation for the rest of the group.

With the Cardo SmartSet app and its remote control feature, you may opt to use your smartphone or tablet to control your SMARTPACK. Make intercom and phone calls, play music or listen to the radio and customize the settings — all from your Android or iOS mobile device.

Enjoy Genuine Group Communication — as it was always meant to be!

Connectivity Options

In DMC Intercom Mode

- Conduct conversations in a group of up to 4 riders at a range of up to 3 miles / 5 kms in full Duplex
- Adaptive virtual network for continuous connectivity

In Bluetooth Intercom Mode

- Up to 4-Way conferencing
- "1+8" intercom toggling
- Click-to-Link: for spontaneous intercom connections

Plus

- *Music Sharing™* technology via A2DP
- Connect two Mobile Phones / GPS device
- MP3 Player – Stream stereo music via A2DP
- Built-in FM radio with RDS
- *Cardo SmartSet* remote control app for full control from a smartphone or tablet.
- *Cardo Gateway* to connect non-Cardo headsets via intercom
- Parallel Audio Streaming enables music to continue playing softly in the background while speaking on the phone or listening to GPS instructions

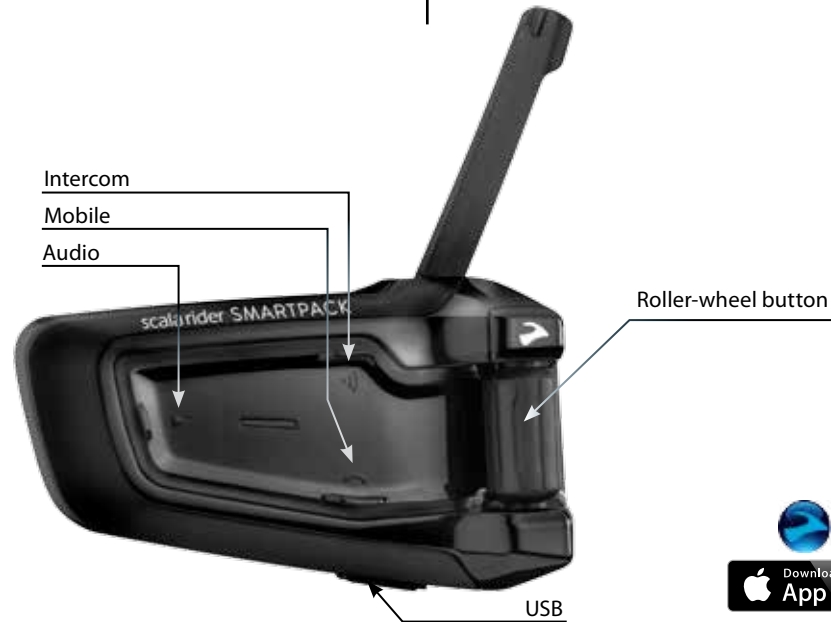

SMARTPACK DUO also available
2 pre-paired SMARTPACK units in one package
